

PepsiCo, Inc. and Subsidiaries Q2 2022 Prepared Management Remarks
Reconciliation of GAAP and Non-GAAP Information (unaudited)¹

In discussing financial results and guidance, the Company refers to the following measures which are not in accordance with U.S. Generally Accepted Accounting Principles (GAAP): organic revenue growth, core results and core constant currency results. We use these non-GAAP financial measures internally to make operating and strategic decisions, including the preparation of our annual operating plan, evaluation of our overall business performance and as a factor in determining compensation for certain employees. We believe presenting non-GAAP financial measures provides additional information to facilitate comparison of our historical operating results and trends in our underlying operating results and provides additional transparency on how we evaluate our business. We also believe presenting these measures allows investors to view our performance using the same measures that we use in evaluating our financial and business performance and trends.

We consider quantitative and qualitative factors in assessing whether to adjust for the impact of items that may be significant or that could affect an understanding of our ongoing financial and business performance or trends. Examples of items for which we may make adjustments include: amounts related to mark-to-market gains or losses (non-cash); charges related to restructuring plans; charges associated with mergers, acquisitions, divestitures and other structural changes; gains associated with divestitures; asset impairment charges (non-cash); pension and retiree medical-related amounts (including all settlement and curtailment gains and losses); charges or adjustments related to the enactment of new laws, rules or regulations, such as tax law changes; amounts related to the resolution of tax positions; tax benefits related to reorganizations of our operations; debt redemptions, cash tender or exchange offers; and remeasurements of net monetary assets. Prior to the fourth quarter of 2021, certain immaterial pension and retiree medical-related settlement and curtailment gains and losses were not considered items affecting comparability. Pension and retiree medical-related service cost, interest cost, expected return on plan assets, and other net periodic pension costs will continue to be reflected in our core results. See below for a description of adjustments to our GAAP financial measures included herein.

Non-GAAP information should be considered as supplemental in nature and is not meant to be considered in isolation or as a substitute for the related financial information prepared in accordance with GAAP. In addition, our non-GAAP financial measures may not be the same as or comparable to similar non-GAAP measures presented by other companies.

Glossary

We use the following definitions when referring to our non-GAAP financial measures:

Constant currency: Financial results assuming constant foreign currency exchange rates used for translation based on the rates in effect for the comparable prior-year period. In order to compute our constant currency results, we multiply or divide, as appropriate, our current-year U.S. dollar results by the current-year average foreign exchange rates and then multiply or divide, as appropriate, those amounts by the prior-year average foreign exchange rates.

Core: Core results are non-GAAP financial measures which exclude certain items from our historical results. For further information regarding these excluded items, refer to “Items Affecting Comparability” in “Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our Q2 2022 Form 10-Q and in “Item 7 – Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our annual report on Form 10-K for the fiscal year ended December 25, 2021. For the periods presented, core results exclude the following items:

Mark-to-market net impact: Mark-to-market net gains and losses on commodity derivatives in corporate unallocated expenses. These gains and losses are subsequently reflected in division results when the divisions recognize the cost of the underlying commodity in operating profit.

Restructuring and impairment charges: Expenses related to the multi-year productivity plan publicly announced in 2019, which was expanded and extended through the end of 2026 to take advantage of additional opportunities within the initiatives of the plan.

Acquisition and divestiture-related charges: Acquisition and divestiture-related charges primarily include merger and integration charges and costs associated with divestitures. Merger and integration charges include changes in fair value of contingent consideration, liabilities to support socioeconomic programs in South Africa, employee-related costs, contract termination costs and other integration costs. Divestiture-related charges reflect transaction expenses, including consulting, advisory and other professional fees.

Gain associated with the Juice Transaction: In the 24 weeks ended June 11, 2022, we sold our Tropicana, Naked and other select juice brands to PAI Partners for approximately \$3.5 billion in cash and a 39% noncontrolling interest in a newly formed joint venture

¹ For a full discussion of our second quarter 2022 financial results, including definitions we use in discussing our financial results, please refer to our second quarter 2022 earnings release and our quarterly report on Form 10-Q for the fiscal quarter ended June 11, 2022 (Q2 2022 Form 10-Q) both available at pepsico.com/investors.

operating across North America and Europe (Juice Transaction). We recognized a gain associated with the Juice Transaction in our PepsiCo Beverages North America (PBNA) and Europe divisions.

Russia-Ukraine conflict charges: In connection with the deadly conflict in Ukraine, we recognized charges related to indefinite-lived intangible assets and property, plant and equipment impairment, allowance for expected credit losses, inventory write-downs and other costs.

Brand portfolio impairment charges: We recognized intangible assets and property, plant and equipment impairment and other charges as a result of management's decision to reposition or discontinue the sale/distribution of certain brands.

Pension and retiree medical-related impact: Pension and retiree medical-related impact includes settlement charges related to lump sum distributions exceeding the total of annual service and interest cost, partially offset by curtailment gains resulting from the Juice Transaction.

Charge related to cash tender offers: As a result of the cash tender offers for some of our long-term debt, we recorded a charge primarily representing the tender price paid over the carrying value of the tendered notes and loss on treasury rate locks used to mitigate the interest rate risk on the cash tender offers.

Tax expense related to the TCJ Act: Tax expense related to the Tax Cuts and Jobs Act (TCJ Act) reflects adjustments to the mandatory transition tax liability under the TCJ Act.

Organic revenue growth: A measure that adjusts for the impacts of foreign exchange translation, acquisitions, divestitures and other structural changes, and where applicable, the impact of an additional week of results every five or six years (53rd reporting week), including in our fourth quarter 2022 financial results. Adjusting for acquisitions and divestitures reflects mergers and acquisitions activity, including the impact, for the 12 weeks ended June 12, 2021, of an extra month of net revenue for our acquisitions of Pioneer Food Group Ltd. in our Africa, Middle East and South Asia (AMESA) division and Hangzhou Haomusi Food Co., Ltd. in our Asia Pacific, Australia and New Zealand and China Region (APAC) division as we aligned the reporting calendars of these acquisitions with those of our divisions. We believe organic revenue growth provides useful information in evaluating the results of our business because it excludes items that we believe are not indicative of ongoing performance or that we believe impact comparability with the prior year.

2022 guidance: Our 2022 organic revenue growth guidance excludes the impact of acquisitions, divestitures and other structural changes, the impact of the 53rd reporting week and foreign exchange translation. Our 2022 core effective tax rate guidance and 2022 core constant currency earnings per share (EPS) growth guidance exclude the mark-to-market net impact included in corporate unallocated expenses, restructuring and impairment charges, and other items noted above. Our 2022 core constant currency EPS growth guidance also excludes the impact of foreign exchange translation. We are unable to reconcile our full-year projected 2022 organic revenue growth to our full-year projected 2022 reported net revenue growth because we are unable to predict the 2022 impact of foreign exchange due to the unpredictability of future changes in foreign exchange rates and because we are unable to predict the occurrence or impact of any acquisitions, divestitures or other structural changes. We are also not able to reconcile our full-year projected 2022 core effective tax rate to our full-year projected 2022 reported effective tax rate and our full-year projected 2022 core constant currency EPS growth to our full-year projected 2022 reported EPS growth because we are unable to predict the 2022 impact of foreign exchange or the mark-to-market net impact on commodity derivatives due to the unpredictability of future changes in foreign exchange rates and commodity prices. Therefore, we are unable to provide a reconciliation of these measures.
